Mobile Feeders & Conveyors

Many processors need to convey raw materials or premixes to several points, but either lack of space or intermittent usage means that separate feed systems cannot be justified.

Mobile feeders are the answer. Easy to maneuver and adjustable in delivery height, they can also be fitted with customized options to enhance their versatility.

Many of our mobile conveyors have been custom built to satisfy space restrictions, such as fitting under mixers or grinders. Even bulk bags (FIBCs) and rigid IBC dischargers can be supplied on mobile frames with integral flexible screw feeders. More examples are shown overleaf.

Standard Features

- Integral Feeder Hopper
- Low Level Control
- Quick Release Connectors
- Screw Reversal for Easy Clean-out
- Stop/Start Controller
- Product Flow Aid

Options

- Height Adjuster
- Dust Hood
- Bag Lifter & Slitter
- Drum Dumpers
- Integral Sieve
- Bag Disposal Spigot

Advantages

- Easy to Clean
- Dust-free
- Gentle Handling
- No Separation of Mixtures
- Low Maintenance
